

GREENING FOOD AND BEVERAGE SERVICES

A GREEN SEAL GUIDE TO TRANSFORMING THE INDUSTRY

CHERYL BALDWIN

Greening Food and Beverage Services

*A Green Seal Guide to
Transforming the Industry*

Contents

1 Sustainability in the Food Service Industry

What Are Sustainability and Greening?

The Environmental Bottom Line

Climate Change • Biodiversity • Natural Resource Depletion and Degradation • Pollution and Toxicity • Can You Help Solve These Environmental Issues?

The Food Service Life Cycle

Environmental Impacts Across the Food Service Life Cycle

Environmental Impacts Can Be Reduced

Case Study: Greening the National Conference Center

Summary

2 Food

The Destructive Impact of Food on the Planet and Why It Matters

Production • Processing • Transportation • Consumption and Waste • Economic and Social Impacts

Environmentally Preferable Food Options

How Do We Begin? • Where Will We Buy This Food? • How Will This Affect Costs? • Do We Need to Change Our Menu? • What Is Certified Food? • What If We Can Only Get Food Grown with Pesticides? • What About Bottled Water and Beverages? • What Are GMOs? • Are Local and Seasonal Food the Same? • What About People Who Resist the Change to Sustainability?

Case Study: New Milford Hospital, New Milford, Connecticut

Summary

3 Food Waste Management

Pre- and Post-Consumer Food Waste

When Does Food Become Waste? • Reasons for Food Waste

Why Food Waste Matters

Environmental Impact • Financial Impact • Social Impact

Conventional Approaches to Food Waste Management

Managing Food Waste

Assess Current Food Waste Management Practices • Conduct a Baseline Food Waste Audit • Create a Food Waste Management Plan

iv Contents

The Reduce, Reuse, Recycle Hierarchy

Reduce Pre-Consumer Food Waste • Reuse Pre-Consumer Food Waste • Reduce Post-Consumer Food Waste • Recycle Pre- and Post-Consumer Food Waste • Alternatives to Landfill and Incineration

Return on Investment

Reduce Economics • Reuse Economics • Recycle Economics

Case Studies

Veteran's Administration Medical Center, Martinsburg, West Virginia

Summary

Appendix: Case Study—Intel Corporation's Cafés

4 Solid Waste Management

Why Waste Matters

Waste Tracking: The Waste Audit

Assessing the Baseline

Waste Management Planning

Establish and Prioritize Goals • Analyze and Select Options • Establish an Implementation and Monitoring Plan

Waste Prevention and Diversion

Eliminate Unnecessary Items • Maximize Use of Reusable Items • Optimize Remaining Items • Staff Training

Case Studies

PowerSource Café • Agnes Scott College

Summary

Appendix: Water Filtration Methods: Addendum IV from Responsible Purchasing Guide to Bottled Water Alternatives

5 Energy and Water Conservation

Energy Use and the Environment

Water Use and the Environment

Energy and Water Management

Understanding Energy and Water Use • Energy and Water Conservation Planning

Energy and Water Conservation

Maintenance • Use Less Energy and Water • Switch to Energy- and Water-Efficient Options • Use Renewable Energy

Case Studies

Founding Farmers, Washington, DC • The Lobster, Santa Monica, CA

Summary

6 Building Operation and Construction

Building Operation and Maintenance

*Energy and Water • Waste • Cleaning and Pest Management •
Indoor Environment Quality • Environmentally Preferable Purchasing
• Green Building Operation Summary*

Building Construction and Renovation

*Site • Energy and Water Conservation • Materials and Resources •
Indoor Environmental Quality • Green Building Standards and Rating
Systems*

Case Studies

*McDonald's Green Restaurant Development • Logan Square Kitchen in
Chicago, IL*

Summary

7 Making Greening Happen

Establish a Greening Plan

Tracking and Reporting

*Carbon Footprint • Water Footprint • Environmental Footprint •
Reporting*

Staff Involvement

Getting the Word Out

Green Marketing

Reaching Into Your Community

Summary
